

Forest Electric New Jersey | Electrical Services in COVID-19

# Your Trusted Electrical Solution— Even in the Most Challenging Times

With our classification as an essential electrical contractor, Forest Electric New Jersey has been working hard to provide the same outstanding electrical services we are known for, even amidst these difficult times.

We are fully operational, continuing to support hospitals, pharmaceutical companies, financial institutions, and more, while following the most stringent health and safety guidelines.

206 McGaw Drive, Edison, NJ 08837

## Keeping Our Front-Line Clients Running

We're proud of the work we've done to support healthcare institutions and other essential businesses. One example was our role providing backup generator power and electrical support for the field medical station at the New Jersey Convention and Exposition Center. The station will house 500 temporary beds as the current health crisis continues.

## Promoting Workplace Health and Safety

Both in the field and at the office, our team is following strict safety policies to help mitigate the spread of airborne pathogens. We have implemented enhanced sanitizing and hygiene measures and are applying the Hierarchy of Controls as it relates to infectious disease.

Our safety director and senior management have been working diligently to keep our clients and employees up to date on the latest information. And, thanks to our powerful vendor network, we have been able to procure and distribute the PPE and sanitizing supplies our workers need.

## How We Can Help

From value engineering through installation and maintenance, we have diverse project expertise. We are continuing to provide a full range of services, including:

- Electrical construction
- Design-build installations
- IT, data, structured cabling, audio visual, and security
- Engineering
- Annual security agreements
- Infrared scanning
- Emergency restoration
