

A Full Suite of Single-Source Electrical Solutions

Forest Electric New Jersey (Forest NJ) offers a full range of turnkey electrical engineering and contracting services for end-users, building owners, and construction companies in a variety of markets across northern and central New Jersey. With expertise in data center infrastructure, healthcare, substations, financial infrastructure, network design, structured cabling, and electrical system design-build, installation and maintenance, Forest NJ can meet your current needs while helping position your facility for the future.

Covering Clients' Every Electrical Need

As a single-source, full-service electrical construction contractor, we can plan, design, install, maintain, renovate, or retrofit virtually any electrical system solution. Whether you need advanced mission critical services, integrated communications networks, more responsive building automation controls, or the latest in sustainable technology, we have you covered. Forest NJ's full suite of electrical services includes:

- » Electrical construction
- » Preconstruction
- » Audio/visual systems
- » Distributed antenna systems
- » Structured cabling
- » Prefabrication
- » Mission critical
- » Industrial
- » Riser management
- » Special projects
- » Sustainability
- » Site-based services
- » Tenant build-outs and renovations

Helping to Achieve Your Goals On-Time and On-Budget

Forest NJ has the broad capabilities, engineering know-how, and contracting experience needed to deliver design-build projects on-time, on-budget, and to the highest standards of quality. Backed by our preconstruction department, prefabrication shop, in-house engineering, and project management capabilities, we can complete projects on either design-build or design-assist basis. We also offer various contract models, including guaranteed maximum price and target value design, to accommodate clients' unique needs.

Providing Ongoing Maintenance, 24/7/365

Forest NJ employs an experienced, trained staff of electricians, craftspeople, managers, and specialists whose site-based maintenance services are among the best and most comprehensive in the central and northern New Jersey area.

Our staff can keep a range of commercial electrical, power systems, data communications, and other vital life safety systems operating at their finest capacities. On call 24/7/365, we offer both ongoing preventive maintenance and rapid emergency service to help keep your systems operating optimally for the long term.
