

SITE-BASED SERVICES

Forest Electric

New Jersey

An EMCOR Company

Electrical Maintenance Services Designed to Fit Your Needs

Forest Electric New Jersey offers comprehensive, high-quality site-based electrical maintenance services for customers in the Central and Northern New Jersey area. Our preventive services are custom designed to match your goals and outcomes, helping your business reduce costs and promote operating efficiency. Our team is made up of highly trained electricians, craftsmen, managers, and specialists who are dedicated to keeping your systems up and running optimally.

An Unmatched Suite of Services

The breadth and depth of our site-based maintenance services is virtually unmatched in the industry. Whether it's a single dedicated technician, an entire team, or something in-between, we have the right crew for the job.

Our staff of skilled, certified electricians utilize cutting-edge technology, including infrared scanning and thermal imaging, to help ensure our customers receive industry-leading maintenance services.

Budget-friendly Pricing

Investing in preventive maintenance services can help reduce operational costs by increasing system efficiency and minimizing business disruptions. We can help you spot equipment malfunctions before they become catastrophes and assist with equipment repair/replacement budgeting and scheduling. Our goal is to avoid costly interruptions to your operations and prevent unnecessary equipment replacement.

OUR ELECTRICAL MAINTENANCE EXPERTISE INCLUDES:

NFPA 70E short circuit/arc flash analysis and labeling

Troubleshooting and diagnostics

Move, add, change services
